Infor Query and Analysis for SunSystems

Insight on demand

It's essential to know the directions your business must take. Whether you're acquiring new companies, launching new products, or pursuing other opportunities, it's important to know where you're headed and why. That takes real business intelligence and reporting proficiency.

Infor® Query and Analysis (Q&A) is an intuitive addition to the capabilities of Microsoft Excel and provides fast and adaptable ways to exchange data in real time with SunSystems®. Q&A provides the finance user with a quick and easy-to-use method to build their own reports such as aged reports, P&L and Balance Sheet reports, with the flexibility to drill down on balances at both summary and transaction levels, expand lines and breakout reports.

Q&A gives employees at all levels of your organization immediate access to data that's relevant to their roles and tasks to inform strategic decisions and recommendations.

SunSystems Cloud can transform the finance function

Innovate faster

- React to ever-evolving market changes and pursue new business opportunities, more quickly and cost-effectively

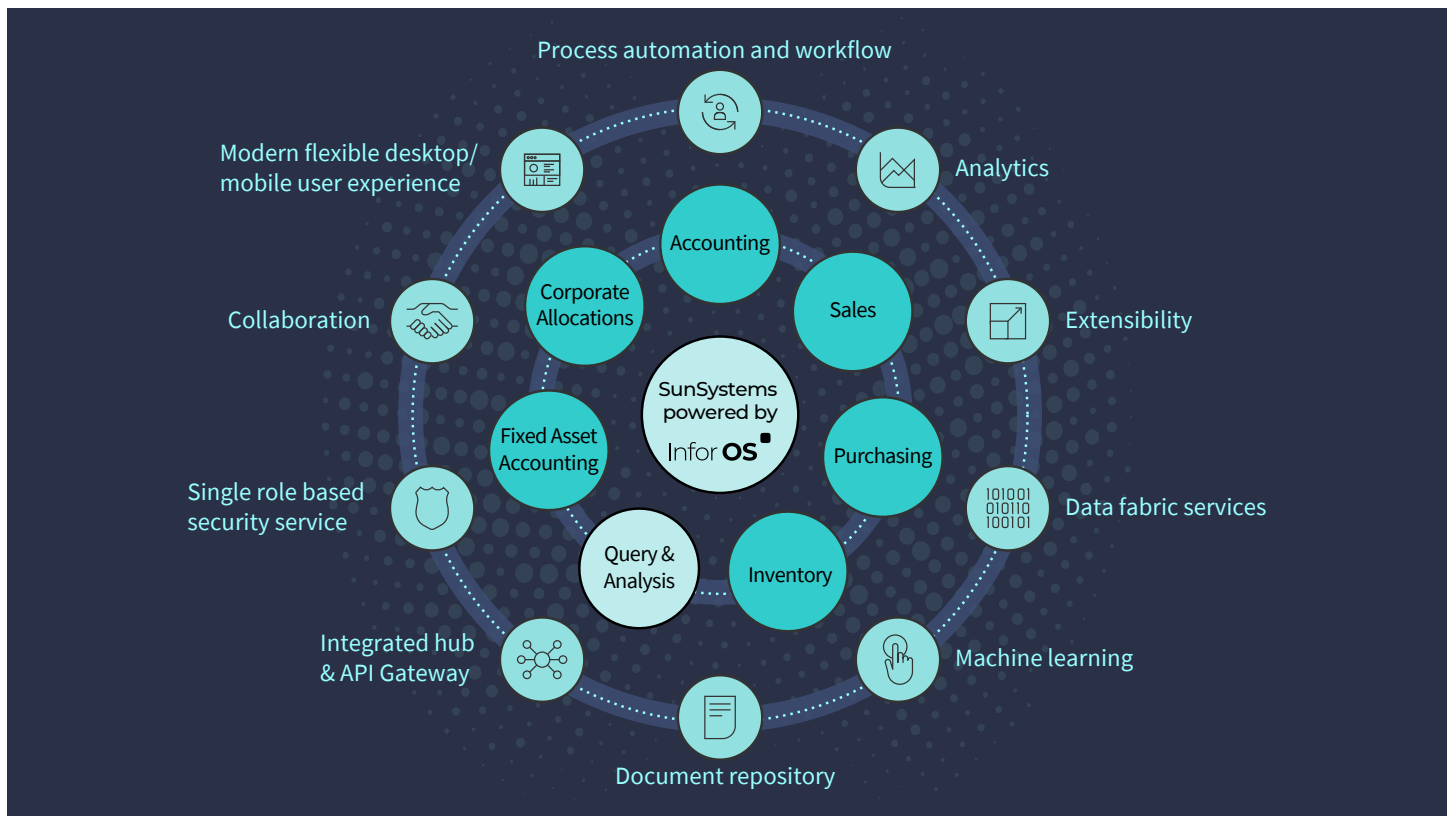

Embrace digital transformation

- Combine business processes with modern technology

Simplify compliance

- Security and compliance updates can be pushed out automatically to the entire organization

Empower decision-making for everyone in your organization with the real-time information that Infor Query and Analysis for SunSystems provides.

Information when you need it

Get a top-down view of your entire business with this dynamic analysis and reporting application's powerful analytical capabilities.

More than 8,000 customers from organizations of all sizes around the world use Q&A to help them make business intelligence and reporting easier and more accurate. With reporting tools that include compliance and regulatory factors, Infor Query and Analysis gives you the information you need, where and when you need it, fast and efficiently. Easily make changes to meet your growing business needs.

Power made easy

With Infor Query and Analysis, you get intuitive desktop applications with a familiar user experience. Users can get up and running quickly with minimal training and technical skill because the software is integrated with Excel®.

- Design your own reports without technical knowledge of the database. Q&A's DataLink technology lets you explore your data using your terminology.
- Quickly and easily analyze business data, measure performance, and be more reactive with access to real-time data.
- Quickly and efficiently create reports that highlight trends, patterns, and exceptions.
- Get dynamic, multi-language, multicurrency, business intelligence tools that are powerful, flexible, secure, easy to use, and are in a consistent interface throughout the software.
- The software needs minimal IT support and involvement which makes the maintenance easier.
- Make inquiries in many ways and get multiple options for visualizing data.
- Schedule your analyses and reports to run at any time.

Turn insight into action

Infor Query and Analysis for SunSystems is a cloud-ready solution that uses web services to deliver the data you need from a server-based query service to your desktop Excel. With Q&A for SunSystems you can:

- Make informed and strategic decisions with confidence, anytime and anywhere.
- Flexibility to drill down, break out, and expand views at both a detailed transactional level and/or summary level.
- Employees from all lines of business can increase efficiency and streamline operations.
- Easily analyze trends, problems, and opportunities that are often concealed within corporate transactional data.
- Save frequently-used analysis procedures and replay them in the future.

Empower your employees

With Query and Analysis ad-hoc query and reporting tools, technical and non-technical users alike can easily get the precise information that's relevant to their roles and tasks and generate reports with the intuitive and efficient interface.

You get intuitive analytics, business intelligence, reporting, and alerting. Working in familiar environment, your employees will be empowered to find the information they need to make better decisions, faster.
